

INSTALACION BOOKSTACK

```
# Ensure you have read the above information about what this script does before executing these commands.
```

```
# Download the script
```

```
wget https://raw.githubusercontent.com/BookStackApp/devops/main/scripts/installation-ubuntu-22.04.sh
```

```
# Make it executable
```

```
chmod a+x installation-ubuntu-22.04.sh
```

```
# Run the script with admin permissions
```

```
sudo ./installation-ubuntu-22.04.sh
```

* Antes de ejecutar el script de instalacion :

```
sudo apt update
```

```
sudo apt install software-properties-common
```

```
sudo add-apt-repository ppa:ondrej/php
```

```
sudo apt update
```

```
sudo apt install -y php8.2 php8.2-curl php8.2-mbstring php8.2-ldap php8.2-xml php8.2-zip php8.2-gd php8.2-mysql libapache2-mod-php8.2
```

```
sudo a2dismod php7.2 php7.4 php7.3 php8.0 php8.1
```

```
sudo a2enmod php8.2
```

Al ejecutar el script le puede dar error una de las razones puede ser que ya tiene el apache instalado,

* apt-get purge apache2 apache2-utils apache2-bin apache2.2-common - no instalar apache antes de ejecutar el script de instalacion.
